Experience

07/2022 - Present

Senior Client data Specialist, JP Morgan Chase, Bengaluru

- Client Onboarding Process Management: Oversaw the entire KYC onboarding workflow, ensuring efficiency and compliance.
- Regulatory Compliance Knowledge: Familiar with KYC and AML regulations, ensuring all processes align with legal standards.
- CIP: Verify the entity and its owners by using official documents such as the certificate of incorporation, articles of organization, IRS documentation, passports, driver's licenses, and national ID cards.
- Data Collection: Gather and accurately record customer information, including entity name, Tax ID, business principal address, full name, residential address, date of birth, and identification numbers. Keep up-to-date with regulations.
- Ownership structure - Update the names and percentages of owners in the system. 25% and above for middle and low-risk customers and 10% for High-risk customers.
- AML summary - Update business description as per customer nature of business, Customer type, and Product and services. Find a suitable NAICS code accordingly.
- CCD - Updating customer turnover as per the fiscal year-end date and updating where customers are holding vendors and assets outside of the country and their geographical location of the business.
- Overseas Activity - Maintain a record of customer's international transactions, particularly those involving high-risk countries, exceeding 5% of their total activity, and request further details from customers if necessary.
- Draft RFI: If any discrepancies are found during KYC, send RFI email to the middle office or sales team to request clarification from the customer. QC collaboration - Part of QC collaboration call. Get clarification on errors with mutual understanding. If required get confirmation from the middle office on difficult scenarios that are not covered in the procedures guide

05/2021 - 07/2022

IBM - (Contract based)

KYC Analyst

- Documentation Collection and Verification: Collected and verified client documents like IDs and proof of address to meet KYC requirements.
- Regulatory Compliance Knowledge: Familiar with KYC and AML regulations, ensuring all processes align with legal standards.
- Review and analyze customer documentation to ensure compliance with regulatory requirements. Data Collection: Gather and accurately record customer information, including full name, residential address, date of birth, and identification numbers.
- Customer Due Diligence (CDD): Conduct CDD for low and medium-risk level customers, which may include more detailed background checks and scrutiny of financial activities.
- Entity address verification involves confirming that the address provided by a business, organization, or legal entity is accurate and corresponds to a legitimate location.
- Overseas activity in the context of KYC (Know Your Customer) and AML (Anti-Money Laundering) refers to financial transactions, business operations, or other activities conducted by a customer in foreign countries.
- Customer Profile Updates: Regularly update customer information and risk assessments as new data or behavior changes emerge. Automated Alerts: Set up automated alerts for activities that fall outside of the customer's expected behavior.
- Reporting and Compliance: Making recommendations for further action if necessary. Work with internal teams to ensure compliance with KYC policies and procedures.
- AML summary - Update business description as per customer nature of business, Customer type, and Product and services. Find a suitable NAICS code accordingly.
