Ashish Rasal, Compliance and Operational Risk Control Specialist

Pune, India, 9923243409, ashishrasal@outlook.com

OVERVIEW

An accomplished investment banking professional with 2 years of experience in the field, boasting a deep understanding of Compliance and Operational Risk Control, particularly in the context of Personal Account Dealings. Adept at delivering effective problem-solving solutions and a firm believer in the implementation of intelligent work methods to drive productivity and enhance task efficiency. Proven track record of consistently meeting compliance and risk management objectives while contributing to the overall success of the organization. Aspiring to dive deep into the field and acquire more quality knowledge and skills.

EMPLOYMENT HISTORY

June, 2022 — 2024

Compliance and Operational Risk Control Specialist, UBS — Pune

- At UBS I received a diversified experience of multiple processes that make up for the function that is Employee conflicts of Interest and Employee Information and approvals.
- In the last 20 months that I spent here, I have worked on multiple processes within the team that helped me understand how my contribution eventually helps to mitigate risk at an organizational level.
- Processing and monitoring of trades helps with the reconciliation of the trade activity and helps us understand if all the employees are compliant with the Global policy on Personal account dealing.
- This manages our exposure to the risk at an organizational level and avoids us getting entangled in any regulatory/statutory audits.
- Processing of applications that we receive for Unlisted Private investments and external directorships and positions keeps the organization from getting exposed to any risk that might arrive due to any investments/roles taken up by the current employees.
- Monitoring and application of global affirmations along with violation assessment for the non-compliant employees.
- I have also assisted in the development of a machine learning tool that helped the team automate the statement processing and trade capturing.
