PROFILE

A highly motivated and detail-oriented MCA graduate with a strong foundation in data analytics, machine learning, and business intelligence. Proficient in Python, SQL, and Power BI, with hands-on experience in data visualization and predictive modeling. Passionate about leveraging data-driven insights to drive business decisions.

EDUCATION

Master of Computer Application
KBC North Maharashtra University 08/2023 – 06/2025 jalgaon, India

Bachelor of Computer Applications
KBC North Maharashtra University 06/2020 – 06/2023 jalgaon, India

SKILLS

Data Analytics :- — Data Cleaning, Data Manipulation, Exploratory Data Analysis (EDA)

Statistics :- — Descriptive Statistics,Probalility,Correlation Regression Analysis

Programming: — Python (Pandas, NumPy, Matplotlib)

Databases & SQL : — MySQL, PostgreSQL

BI & Visualization : — Power BI, Tableau, Excel

Machine Learning : — Regression, Classification, Time Series Forecasting

Tools & Libraries : — Jupyter Notebook, VS Code, Git, Power Query

PROFESSIONAL EXPERIENCE

Data Analyst Intern
GPT Software , Pune (01/2025 - 6/2025)
- Analyzed datasets to provide actionable insights and recommendations.
- Developed hands-on expertise with tools and techniques for data analysis.
- Gained practical knowledge of applying concepts learned in class to real-word projects.

PROJECTS

Company Billing System
Technologies Used:- SQL , MySQL, Python,Power BI
- Developed and optiizes a biling system to ensure accurate financial record-keeping and transaction management.
- Designed and analyzes datasets to generate insights about revenue trends and customer billing patterns.
- Created interactive dashboards and reports to monitor billing performance metrics.

Stock Price Prediction using Machine Learning
Technologies Used:- Python, Scikit-Learn
- Built a predictive model for stock price forecasting using historical data.
- Implemented Linear Regression and LSTM for trend analysis.
- Visualized predictions using Matplotlib and Seaborn.

Customer Churn Prediction using Machine Learning
Technologies Used:- Python, Scikit-Learn
- Built a classification model to predict customer churn based on behavioral data.
- Used Logistic Regression, Decision Trees, and Random Forest for model comparison.
- Achieved 85% accuracy using feature engineering and hyperparameter tuning.

E-commerce Sales Analysis
Technologies Used:-Python,SQL
- Analyzed Sales data to identify top-selling products and seasonal trends.
- Created data visualizations to aid decision-making and improve sales strategies.
- Provided actionable recommendations for better inventory and customer targeting.

Financial Data Analysis
Technologies Used:-Python, Power BI
- Conducted trend analysis on stock price and revenue distributions.
- Visualized revenue shares and stock price fluctuations for key business decisions.
- Predicted stock price trends using historical data for strategic planning.

CERTIFICATES

- Machine Learning
- AWS
