PROFESSIONAL EXPERIENCE

Infosys BPM ltd.

Process specialist||Payroll processing

01/2024

- Calculate and manage employee pay, deductions, and benefits correctly and on time.
- Collect and check important employee details, including personal information, contact info, bank account details, separation details, and salary information.
- Track Time and Attendance: Keep accurate records of employee work hours, including overtime, leave, and other important details.
- Manage Benefits and Deductions: Identify and track employee benefits (e.g., health insurance, retirement contributions) and mandatory/voluntary deductions. Handle registration for new hires and deregistration for employees who leave in Workday.
- Maintain Payroll Records: Keep accurate records of payroll transactions and employee details for future use and audits.
- Resolve Errors: Look into and fix any payroll issues or mistakes reported by employees.
- Work with HR: Coordinate with the HR team to make sure all employee updates—like new hires, terminations, or changes in job status—are correctly updated in the payroll system.
- Ensure Timely Payments: Make sure employees are paid accurately and on time, usually through direct bank transfers.
- Worked on the documentation part like SOP
- Resolve Issues: Quickly and accurately fix any payroll errors or discrepancies.
- Handle Employee Queries: Respond to payroll-related questions submitted through the helpdesk.
- Validate Reports: Check the output report against the input file to ensure accuracy.
- Communicate Changes: If any updates occur during payroll processing, immediately inform the vendor to address them.

Dexciss technology

Implementation Consultant/Project management
07/2023 - 12/2023

- Client Implementation Support: Assist in onboarding new clients by gathering information, setting up client profiles, and importing historical data into the ERP system. Provide clients with guidance and best practices for using the software effectively.
- Project Management: Develop detailed project plans, including timelines, resource planning, and risk assessments. Lead cross-functional teams to ensure smooth and timely implementation.
- Client Communication & Support: Handle client and employee queries through the helpdesk system, maintaining clear and timely communication with customers and stakeholders.
- System Customization & Configuration: Work closely with technical teams to customize and configure the ERP system based on business workflows and client needs. Adjust system settings to enhance performance and usability.
- Transition & Training: Oversee the initial transition period to ensure all transactions are processed accurately and on time. Deliver training sessions to end-users to ensure they understand how to use the system efficiently.
- User Acceptance Testing (UAT): Conduct structured and well-documented UAT to confirm the system meets business requirements and performs as expected.
- Go-Live Support: Provide hands-on support during the go-live phase to ensure a smooth transition and resolve any immediate issues.
- Post-Implementation Support: Monitor system performance after implementation, gather user feedback, and provide ongoing technical support, updates, and improvements as needed.
- Documentation & Reporting: Maintain detailed records of project progress, system configurations, and training materials. Share regular status updates with management and key stakeholders.

Neeyamo Enterprise Solution

Global payroll Implementation Consultant|| Payroll processor
09/2020 – 06/2023

- Implementing a system as per the client's requirements and working closely with clients to understand their business processes and requirements.
- Assist with the implementation process of new clients like information gathering, setting up clients, enrolling employees, and loading historical information in the payroll platform. Provide guidance and best practices to clients on how to use the software.
- Understanding the client requirements and configuring the software to address client requirements also perform UAT (User Acceptance Testing) testing which should be structured and recorded. Proof as to whether the new system delivers to a specification of the business need.
- Implemented and processed the payroll for multiple projects with 5+ countries with a rapid approach.
- Conduct a parallel run of the payroll data in our system.
- Communicating with all parties involved in the implementation process. Resolving client and employee queries using the help desk system.
- Manage workflow through the first payroll period to ensure all payroll transactions are processed accurately and timely.
- Lead and implemented transition activities for 2000+ headcount with renowned clients and achieved targets with well-planned and customized project management tools with a timely delivery approach.
