LinkedIn Profile Pune, Maharashtra, India

I'm Vaishnavi Pardeshi, Cybersecurity specialist blending technical expertise with risk management insight, with 2.5+ years of experience as a freelancer and 1 years at Contractor+ across penetration testing, threat analysis, fraud detection, and compliance. At Contractor+, I worked as a Pen-Test Engineer securing applications and networks, and as an Underwriting Admin reviewing merchant applications, detecting fraud, investigating failed transactions, and strengthening compliance processes. Alongside this, I've built a strong freelance career as an ethical hacker and bug hunter, securing 70+ companies and earning hall of fame recognition. Curious, adaptable, and analytical, I bring both the hacker's mindset and the investigator's eye to every challenge.

WORK EXPERIENCE/HISTORY

Cybersecurity Expert - (Contractor+) | Remote (India) (04/2025)

- Conducted comprehensive web application penetration testing and API penetration testing (including static and dynamic analysis) of Contractor+ internal products.
- Actively searched for potential security issues and security gaps that standard security scanner tools were unable to detect.
- Accurately validated the presence of identified vulnerabilities.
- Conducted Vulnerability Assessment and Penetration Testing (VAPT) on network IPs.
- Identified methods that attackers could use to exploit weaknesses and logic flaws.
- Performed security analysis and identified possible vulnerabilities in the key derivation function.
- Created detailed Vulnerability Assessment reports that identified exposures, rated the severity of the system, suggested mitigations for any exposures, and tested known vulnerabilities.
- Reported 30+ critical vulnerabilities and 50+ others.

Underwriting Admin Contractor+ | Remote (India) (04/2025)

- Reviewed and verified Contractor+ Pay merchant applications by analyzing websites, phone numbers, and online presence to identify potential fraud.
- Documented findings in CRM systems, flagged inconsistencies, and recommended actions on suspicious accounts. Investigated failed transactions, requested supporting documents (invoices, job site photos, receipts), and advised on payout suspensions when necessary.
- Collaborated with the underwriting team to refine fraud detection strategies and strengthen compliance processes.
- Gained hands-on training in underwriting, compliance, and fraud prevention while developing strong research, analytical, and communication skills.

PROJECT

2022/2023 - Identification of malicious injection attacks in profile injection and co-visitation behaviors.

- This project aims to detect fake reviews given on a particular product of an e-commerce website.
- A Spam filter, semantic algorithm was used to detect and sort the reviews given on the product.

EDUCATION

2021/2023 Bachelor of Engineering in Computer engineering — 8.90 CGPA

2018/2020 Diploma in Computer Engineering — 84.29

CERTIFICATIONS:

Certified ethical hacker - EC-Council

TECHNICAL SKILLS

Penetration Testing & Security

- Web Application Security Testing (OWASP, Burp Suite, Nmap)
- Mobile Application Security (Android app reverse engineering, vulnerability detection)
- Network Penetration Testing (infrastructure mapping, firewall & protocol analysis)
- Vulnerability Assessment & Threat Modeling

Networking & Security Fundamentals

- TCP/IP, DNS, HTTP/S, SSL/TLS protocols
- Firewalls, IDS/IPS, VPNs
- Secure network design principles

Tools & Platforms

- Burp Suite, Nmap, Wireshark, Metasploit, SQLmap
- Android Security Tools (APKTool, MobSF)

Scripting: Bash, Python (basic)

ADDITIONAL INFORMATION/ADDITIONAL EXPERIENCE/EXTRACURRICULAR ACTIVITIES

Accomplished bug hunter with over 2+ years of experience securing over 70 companies during this time.

01.2023/— 01.2025 Freelance.

Cybersecurity Researcher, Remote

Recognized for helping companies discover and mitigate vulnerabilities in their systems, resulting in improved security and being added to their hall of fame.
