PROFESSIONAL SUMMARY

HRMS Implementation Engineer with 1+ year at Relyon Softech Ltd. — delivered end-to-end Saral PayPack (Cloud HRMS) deployments for 30+ enterprise clients across Payroll, T&A, Recruitment, Leave, and Compliance modules. Strong SQL diagnostic skills, deep statutory knowledge (PF/ESI/TDS), and proven ability to reduce implementation timelines by 20% through structured frameworks. Seeking HRMS Consultant or ERP HCM Functional Analyst role.

TECHNICAL SKILLS

Database & Query
SQL (Advanced), MySQL, MS SQL Server, Payroll DB Diagnostics, Multi-table SQL Analysis, Data Migration Scripts

HRMS / ERP Domain
Saral PayPack HRMS, Cloud HCM, SAP HCM (Basics), Payroll Configuration, T&A Module, ESS Portal, Recruitment Module, Leave Management, PMS / Appraisal, BGV / Onboarding, Offboarding / Exit, Help Desk Workflows

Statutory Compliance
Indian Payroll, PF / EPF, ESI / ESIC, TDS / Form 16, Labour Law, Statutory Reports

Data & Analytics
Python (Pandas, NumPy), Power BI, Excel (Advanced), EDA, Data Analysis, MIS Reporting

Implementation
Requirement Gathering, GAP Analysis, System Configuration, UAT / Testing, SOP Documentation, Stakeholder Management, Data Migration, Go-Live Support

Tools & Others
Git / GitHub, Biometric Integration, Geo-fencing, IP Restrictions, Shift & Roster, Workflow Config, Cloud HRMS

PROFESSIONAL EXPERIENCE

Relyon Softech Ltd.

Nov 2024 – Present

Implementation & Support Engineer — Saral PayPack HRMS (Cloud-Based SaaS)

- Led end-to-end HRMS implementation for 30+ enterprise clients — requirement gathering, GAP analysis, system configuration, data migration, UAT, and go-live across Payroll, Recruitment, T&A, Leave, and PMS modules.
- Resolved 50+ client queries per month using advanced SQL queries on Saral PayPack database — payroll master tables, statutory deductions, and employee records.
- Reduced average implementation timelines by 20% through structured requirement-gathering frameworks and reusable SQL scripts for data migration.
- Identified systematic ESI/PF/TDS payroll errors via multi-table SQL diagnostics; root cause analysis led to a critical product patch release.
- Built comprehensive SOP documentation and data-flow guides enabling Tier-1 support to independently handle recurring client issues.
- Validated new features using SQL-based verification on staging environments before production rollout — in collaboration with product team.
- Configured biometric attendance, geo-fencing, IP restrictions, rotating shift policies, and ESS role-based access for diverse enterprise clients.
- Delivered 24-hour hospital workforce configuration — rotating shifts, punch calibration, handover workflows, and multi-department attendance management.

KEY PROJECTS & ACHIEVEMENTS

Payroll Discrepancy Root Cause Analysis — SQL Diagnostics | Relyon Softech | 2024–2025

- Detected systematic ESI calculation error for 500+ employees via SQL queries across 6 related tables — saved client from major statutory compliance penalty.
- Root cause report delivered to product team; patch released in next version — preventing recurrence across all affected clients.

Multi-Client HCM Implementation — Manufacturing & Services Sector — Lead Functional Implementer | 2024–2025

- Implemented Saral HRMS for 15+ enterprise clients covering full module suite — Payroll, Recruitment, T&A, Leave, PMS.
- Reduced implementation time by 3 weeks via standardized templates, configuration checklists, and reusable SQL migration scripts.

Hospital 24/7 Shift & Attendance Configuration — HRMS Attendance Module | Technical Configuration

- Configured 24-hour rotating shifts, geo-fencing, IP whitelisting, and attendance calibration for multi-department hospital workforce.
- Built ESS portals with role-based access and punch correction workflows for nursing, medical, and administrative staff.

EDUCATION

Bachelor of Technology (B.Tech) — Computer Science & Engineering — 2020 – 2024

Shri Ram Institute of Technology, Jabalpur — **CGPA: 8.5 / 10**
