QA Automation Engineer | Playwright | Manual Testing | API Testing | SQL | **Immediate Joiner |open to Any field**

Experience: 3 Years 7 Months

LinkedIn | GitHub

QA Automation Engineer with 3.7 years of experience in automation + manual testing, API testing, and SQL validation across Banking and Healthcare applications. Developed and maintained Playwright automation using JavaScript with Page Object Model (POM), hooks, and fixtures, and integrated CI/CD execution using GitHub Actions. Performed REST API validation using Playwright Request Context with authentication, response verification, API mocking, and network interception, alongside UI end-to-end test coverage and backend data validation using SQL. **Seeking an opportunity where I can leverage my skills, ready to learn and grow. Immediately available**.

## KEY SKILLS

- Automation Testing- Playwright Framework
- Java script (Basics)
- SQL
- JIRA
- Manual Testing
- API testing – Postman, Swagger
- CI/CD pipeline- Git
- Agile

## CERTIFICATION

- Playwright JS/TS Automation Testing from Scratch & Framework CERTIFICATION
- Practiced on live test environment: OrangeHRM and Rahul Shetty Academy practice pages.

## WORK EXPERIENCE

**Programmer Analyst - Cognizant Technology Solutions** **Nov 2017 - Jun 2021**

- Designed, developed, and executed 300+ functional and regression test cases manually that contributed to a reduction in production defects across multiple releases.
- Identified, documented, and tracked 100+ defects using JIRA, collaborating with developers to ensure timely resolutions.
- Improved sprint delivery efficiency by 15% through active participation in Agile ceremonies and continuous process improvements.
- Performed backend validation using SQL queries to verify data integrity across application layers.
- Contributed to release sign-off by preparing test execution and test summary reports.
- Designed and executed 300+ test cases across Banking and Healthcare applications, ensuring comprehensive functional coverage and supporting on-time sprint deliveries.
- Validated backend data across 15+ relational database tables using SQL, identifying inconsistencies before UAT and preventing production data issues.
- Reviewed business requirements and designed test scenarios to ensure end-to-end functional coverage before release.
- Supported UAT by reproducing reported issues, validating defect fixes, and helping achieve successful business sign-off before production deployment.
- Automated and supported manual test cases using Playwright (JavaScript) with Page Object Model (POM), hooks, fixtures, assertions, and locators across multiple browsers, reducing regression execution by 50%.
- Developed and maintained GitHub projects showcasing Playwright automation frameworks, version control using Git and CI/CD integration with GitHub Actions.
- Accelerated script development through Playwright code generation while reducing debugging time using Trace Viewer, Playwright Inspector, screenshots, videos, and HTML reports.
- Automated REST API validation using Playwright Request Context covering GET, POST, PUT, DELETE operations with response verification, API mocking, and network interception.
- Automated upload and download workflows, validating file integrity and end-to-end data accuracy.

## PROJECTS

**Identity Data Management (IDM) - Northern Trust | Cognizant Technology Solutions** **22 Months**

- Validated Identity and Access Management (IAM) workflows covering user provisioning, Active Directory groups, privileged access, and Grant ID provisioning to ensure secure user access across banking applications.
- Worked on modules including Active Directory Groups, High Privileged Jobs, and Grant ID Provisioning.
- Executed functional, integration, and backend validation for critical banking workflows, contributing to stable application releases across Agile sprints.
- Mentored newly onboarded QA engineers on testing processes, defect management, and project-specific workflows to accelerate team onboarding.
- Collaborated within a 10-member cross-functional Agile team during 2-week sprint cycles, delivering assigned testing activities within sprint timelines.
- Participated in sprint planning, daily stand-ups, backlog grooming, sprint reviews, and retrospectives.
- Prepared release readiness reports enabling stakeholders to make informed go/no-go decisions before production deployment.

**Anthem Healthcare - P2A DOCGEN Adaptor (Product Plan Management) | Cognizant Technology Solutions** **19 Months**

- Performed end-to-end testing for healthcare product plan management and document generation workflows.
- Validated complex business rules and ensured application stability across multiple release cycles.
- Executed regression and smoke testing to maintain quality standards for each sprint delivery.

## EDUCATION

**B.Tech / B.E. | Electronics and Communication Engineering (ECE)** **2017**

Hindusthan College of Engineering and Technology, Coimbatore
Marks - 76%
