Ph: +917840909906 | **Email:**payal.kothekar@gmail.com | **LinkedIn**

Objective

Seeking a challenging role in Data Analytics or Regulatory Affairs where I can leverage my technical skills and knowledge to drive efficient customer satisfaction, enhance compliance, and support data-driven decision-making for organizational growth.

Professional Summary

Professional with over 4 years of experience as a Senior Regulatory Affairs Specialist, including **1.5 years in Designing and Development of interactive Tableau Reports and Dashboards, Visualizations and advanced Data Analysis**. Ability to deliver data-driven insights, hosting global client meetings, and fostering cross-functional collaboration. **Certified as a Tableau Desktop Specialist** and **Microsoft Power BI Data Analyst Associate** and Acquired skills in Python, SQL, and Advanced Excel.

Professional Experience

LabCorp Scientific Services & Solutions (Fortrea), Pune 21-May-2018 – 8-April-2022

Roles and Responsibilities

Senior Regulatory Affairs Specialist Jan 2021– April-2022

- Design and develop dashboards and reports using Tableau Desktop to analyze supplier-driven changes by providing actionable insights on the impact of these changes on raw materials.
- Create and manage data extracts, data blending, and calculated fields.
- Ensure data integrity by cleaning, transforming, and preparing data for analysis.
- Collaborate with stakeholders to gather, analyze, and document business requirements for reporting and dashboard needs

Regulatory Affairs Specialist May-2018 – Dec-2020

- Evaluated and analysed supplier-driven changes to assess compliance and raw material impact.
- Facilitated weekly global triage meetings, collaborating with clients and cross-functional teams on change strategies.
- Coordinated with suppliers, stakeholders, and vendors to address regulatory inquiries and requirements.
- Managed regulatory documentation including compliance trackers, reports, meeting agendas and SOPs.
- Supported raw material qualification, audits, and global regulatory queries through deliverables and ad hoc reporting. Addressed global regulatory queries for raw materials portfolio.
- Managed Regulatory raw material lifecycle involved in activities closely related to pre-market surveillance of products for consumer portfolio.
- Developed and Managed global change controls, packaging specifications and raw material specifications.

- Trained and mentored team members on regulatory processes and compliance standards.

Projects and Publications

1. **Power Bi Project: AdventureWorks Sales Analysis (Github_PowerBi_Project)**
    - Developed an interactive Power BI dashboard and created visualizations using DAX and Data Modeling to analyze sales performance by region and product category.
2. **Python Project: Supply Chain Analysis (Github_Python_Project)**
    - Conducted exploratory data analysis and created visualizations in Python to identify high-revenue regions, sales, monitor stock levels and product categories that drive business growth and provide insights effectively.
