Summary

Finance professional with almost 2 years of experience in financial analysis, budgeting, and compliance in the banking domain. Proficient in financial modelling, advanced Excel, and Power BI, with hands-on experience in analysing financial data, preparing dashboards, and supporting cost optimization. Demonstrated expertise in KYC/AML, risk assessments, and fraud detection while working with global banking clients. Strong analytical and reporting skills with a focus on accuracy, process improvement, and stakeholder coordination. Currently seeking challenging opportunities in Financial Analysis, Equity Research or FP&A roles.

Technical Skills

- **Financial Planning and Analysis**: Forecasting, budgeting, cost-revenue analysis, Scenario modelling
- **KYC & Compliance**: AML protocols, fraud detection, EDD, transaction monitoring
- **Data Analysis and Visualization: Power BI, Excel (Pivot table, Lookups, Macros)**
- **Financial reporting and dashboard**: Monthly/Quarterly Reporting, Automated dashboards using Power BI and Excel
- **Equity & Market Research**: Risk evaluation, data-driven insights.
- **Collaboration**: Cross-functional stakeholder management, Reporting to finance head and compliance team.

Work Experience

Financial Analyst| Tata Consultancy Services | Pune, India| October 2023- Present.
Client project – Leading Australian Bank | TCS (2023- 2025)

- Worked as part of a strategic engagement with one of the top banks in Australia (AMP). Key responsibilities included:

  - Conducted financial reporting and forecasting for business performance using Power BI dashboards and excel based models.
  - Handled end-to-end KYC and AML processes for high-sensitive profiles, ensuring APRA compliance.
  - Reduced team errors by 40% by introducing standard checklists and review processes.
  - Collaborated with finance, compliance, and audit teams for accurate reporting and risk control.
  - Supported transaction monitoring and flagged suspicious activity as part of AML procedures.
  - Enhanced data quality and reporting efficiency through process automation initiatives

- Conducted **Financial Modelling** and scenario analysis to evaluate cost-saving opportunities and forecast financial performance.
- Performed enhanced due diligence (EDD) on high-risk clients, validating sources of funds and ensuring regulatory compliance with **AML** and **APRA** standards.
- Identified and flagged suspicious transactions, reducing potential financial risks through timely escalation and **Fraud Detection** techniques.
- Coordinated with financial controllers and compliance teams to ensure accurate transaction processing and audit readiness.
- Delivered periodic reports and variance analysis comparing **forecast vs. actuals**, supporting business planning.
- Led internal sessions to **train** new joiners **on KYC workflows, reconciliation processes**, and **risk handling procedures,** improving team efficiency.
- Built and maintained interactive **Power BI dashboards** for performance tracking, financial reporting, and senior leadership presentations
