Pune

## Summary

Analytical and detail-oriented business analyst with hands-on experience in compliance operations at Amazon and a foundational understanding of machine learning workflows. Skilled in leveraging data tools like Excel, SQL, Power BI, Tableau, and contributing to ML-based initiatives through data validation, feature tagging, and classification accuracy. Adept at identifying business insights from large datasets, optimizing operational workflows, and collaborating with global stakeholders.Combines data storytelling with research, and process improvement.

## Professional Experience

**Product Compliance Sr Associate,** *Amazon* 08/2023 – 08/2025 | Pune

- Spearheaded compliance operations across EU marketplaces (France, Germany, Spain) for batteries, packaging, and EPR classifications, ensuring 100% regulatory adherence.
- Supported machine learning initiatives by validating product classification datasets, identifying true/false positives, and enhancing model accuracy.
- Utilized Excel functions, including VLOOKUP, pivot tables, and conditional formatting, for compliance reporting and anomaly detection.
- Performed root cause analysis on misclassified data, contributing to Improvements in data labeling and ML. model training quality.
- Collaborated with global teams to streamline processes and reduce turnaround time.
- Utilized Excel's VLOOKUP function to maintain an efficient daily task tracker, streamlining productivity monitoring and ensuring accurate task completion records.

## Projects

**EPR WEEE battery classification - regulatory compliance** 11/2024 – 01/2025

- Mapped 5,000+ electronic items to the correct EPR categories using attribute-based logic, supporting potential training datasets for compliance-related ML models
- Designed a visual research interface for image-based classification - foundational for future computer vision applications in compliance.

**FR ADC-Machine Learning-Based Product Categorization** 05/2024 – 07/2024

- Analyzed over 10,000 product records to validate ML-generated category matches using classification logic
- Built a color-coded keyword tool to visually support the data annotation process, increasing analyst productivity by 75%
- Improved classification precision, contributing to the success of ML model training for product categorization

**Seller Partner Applications - Process Optimization & Tool Automation** 10/2023 – 12/2023

- Automated high-volume manual processes using logic-based tools that reduced response time and errors
- Though not directly ML-based, the solution supported data quality for future ML integration

## Education

**Bachelors in Business Administration,** 2020 – 2023 | Pune
*Indira college of commerce and science*
Specialization: International Business
CGPA: 9.22

**HSC,** *City Pride Jr. College* 2018 – 2020 | Pune
Score: 86.6%

## Skills

SQL Queries & Database Management
Advanced Excel & Data Modeling
Power BI & Tableau Dashboards
Data Cleaning & Visualization
Power BI
Tableau
Data analysis
Problem Solving & Root Cause Analysis
Tally ERP, MS Office
Market Compliance & Regulation
Advance Excel
Root Cause analysis
Database Management

## Certificates

- Advance Excel & Master Excel
- Tableau
- Product Licensing and Global Communication
- Advance excel
- Digital marketing
- Power BI
- SQL for Data Analytics Digital
- Microsoft Office
- GST
- Power BI
