Nellore, Andhra Pradesh, India

Education

Narayana Engineering College — Nellore, India
Bachelor of Technology in Computer Science Engineering; CGPA: 9.0/10 — *Nov 2022 – Mar 2026*

Technical Skills

Programming Languages: Java, Python, SQL
Data Structures & Algorithms: Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Sorting, Searching
Databases: MySQL, PostgreSQL, Database Design and Optimization
Machine Learning: Scikit-learn, TensorFlow, Supervised and Unsupervised Learning, Model Evaluation
Natural Language Processing: NLTK, Text Preprocessing, Tokenization, Intent Recognition
Tools & Technologies: Git, MS Office Suite (Excel, Word, PowerPoint), Google Cloud Platform
Concepts: Object-Oriented Programming, Software Development, Data Analytics, Cloud Computing

Experience

Python Developer Intern — May 2024 – June 2024
Innovate Intern — *Chennai, Tamil Nadu, India*

- Designed and developed an intelligent chatbot using Natural Language Processing techniques in Python, enabling real-time conversational interactions with users
- Implemented text preprocessing, tokenization, and pattern matching algorithms using NLTK and regular expressions to achieve 85% intent recognition accuracy
- Built conversation flow logic with keyword matching and response generation, reducing response time to under 200ms per query
- Optimized code structure and improved chatbot efficiency by 30% through modular design and algorithmic improvements

Projects

NLP-Based Chatbot System — Python, NLTK, Regular Expressions
Personal Project

- Created an interactive conversational agent capable of understanding natural language queries and providing contextual responses
- Engineered custom NLP pipeline for text normalization, stemming, and entity extraction to improve response accuracy
- Integrated intent classification system to handle multiple user query categories with 80%+ accuracy rate

Database Management System — SQL, MySQL
Academic Project

- Designed and implemented a relational database system with normalized schemas supporting complex queries and transactions
- Optimized query performance through indexing and query rewriting, reducing execution time by 40%
- Developed stored procedures and triggers to maintain data integrity and automate routine database operations

Data Analytics Dashboard — Python, Pandas, Matplotlib
GenAI Job Simulation - Tata

- Analyzed large datasets to extract actionable insights and visualize trends using Python data science libraries
- Created interactive visualizations and reports to communicate findings to stakeholders effectively
- Applied statistical methods and machine learning techniques for predictive analytics and data-driven decision making

Certifications

Algorithms & Data Structures Certification – Demonstrated proficiency in core CS fundamentals
Cloud Computing Certification – Knowledge of cloud infrastructure and distributed systems
Tata GenAI Powered Data Analytics Job Simulation – Applied AI techniques to real-world data analytics scenarios

Achievements & Leadership

Solved 200+ data structures and algorithms problems across competitive coding platforms
Completed multiple industry-recognized certifications in algorithms, cloud computing, and data analytics
Built portfolio of ML and NLP projects demonstrating practical application of theoretical concepts
Active participant in coding challenges and hackathons, continuously improving problem-solving skills
