PERSONAL PROJECTS

Flight Booking System (01/2024 - 05/2024)

- Developed a Flight Booking System aimed at enhancing efficiency and improving the overall user experience. The system streamlines ticket booking processes, reduces manual effort, and ensures a seamless booking experience for users. By simplifying flight reservations and management, it contributes to increased user satisfaction and operational efficiency in the aviation sector.

Weather Forecasting System (09/2024 - 04/2024)

- Developed a Weather Forecasting System that provides real-time weather information using API integration. The system allows users to enter a city name and view accurate weather forecasts, including temperature, humidity, wind speed, and current weather conditions, offering a simple and user-friendly way to access weather updates.
