PROJECTS

Salary Disbursement Automation through Corpay
Implemented automation for the salary disbursement process by integrating the payroll system with Corpay, enabling timely and accurate employee salary processing. This automation significantly reduced manual intervention, minimized errors, and ensured on-time payments. Collaborated with the technical and finance teams to configure secure file transfers, validate payment data, and streamline the overall disbursement workflow, improving efficiency and compliance.

Customer Migration to Latest Payroll System Version

Led the migration project for live customers to the latest version of the payroll system, ensuring a seamless transition with minimal disruption. The migration enhanced system functionality, streamlined end-to-end payroll processes, and improved overall product efficiency. Collaborated with cross-functional teams to validate data accuracy, configure updated modules, and ensure compliance with statutory requirements. This initiative resulted in improved system performance and better customer experience.

Payroll System Implementation and Client Demo Preparation

Prepared and configured the payroll system for client demonstrations, showcasing complete end-to-end implementation and processing. This involved setting up employee data, configuring pay structures, managing statutory components such as CPF, Social Security and ensuring compliance with local regulations. Collaborated closely with the implementation and testing teams to ensure accuracy and smooth workflow across all payroll modules. The demo environment effectively highlighted system capabilities to potential clients, supporting successful onboarding and customer acquisition efforts.
